***Reason for Allowance***

Claims 7 and 9-12 are allowed.

The following is an examiner's statement of reasons for allowance:

The prior art references cited do not teach or suggest a method for controlling a passive matrix liquid crystal display device comprising transferring a charge applied to a selected row  $n$  to a storage capacitor for only a first period of time and then subsequently transferring the charge remaining on the selected row to a reference potential in the case of a transition from the selected row  $n$  to another row  $n+1$ ; connecting the storage capacitor to the another row  $n+1$  to transfer a charge to the another row  $n+1$ , and subsequently connecting the another row  $n+1$  to a source for providing a required row voltage, but none as recited in claim 7.

The prior art references cited do not teach or suggest an active matrix liquid crystal display device comprising in the case of a transition from a selected row  $n$  to another row  $n+1$  the charge applied to the selected row  $n$  is transferred to an intermediate voltage level corresponding the column voltages supplied to the column for only a first period of time and then the charge remaining on the selected row is transferred to a reference potential, and the another row  $n+1$  is first connected to the storage capacitor at a selected time after the end of the first period of time and is then subsequently connected to a source for providing a finally required row voltage, but none as recited in claim 11.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue
